

Why *SHUFFLE* Your On-Hold Messaging?

You've Got To Keep It Fresh

With nearly Twenty years in the On-Hold industry we've learned a few things about maintaining an effective on-hold message. One of which is keeping your on-hold message fresh. With this in mind we created an industry first, the On-Hold "*Shuffle*". It's fast, it's fun & it's very easy to use!

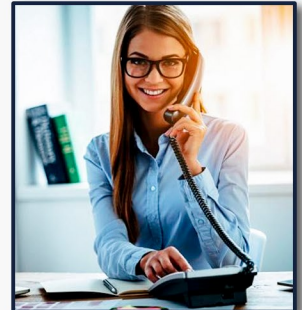

Shuffle's CMS (Content Management System) was designed with your busy schedule in mind. You'll find that with just a few minutes each quarter, your on-hold message will always sound fresh and interesting to your callers!

The *Shuffle's* proprietary, industry-leading technology lets you build as many custom "*Shuffle*" playlists as you desire, with custom content stored in your personal easy to access custom library secured on our servers. Additionally, we have licensed hundreds of background music tracks so you'll be able to select just the right genre to give your on-hold message that perfect "studio production" sound!

Why You Need to Have *SHUFFLE* Working for You:

- Keep your callers engaged with timely, intriguing messages
- Callers hear diverse content from your playlist every time they call
- Set beginning and ending dates for time sensitive messages
- Prioritize newly-recorded scripts in your playlist for more exposure
- Easily add "top-selling product" scripts from your national libraries
- Set up your production schedule quarterly or bi-annually in minutes
- Print reports for management or co-op reimbursement
- Cloud-Based technology for easy access from any device

Building your business... one caller at a time.
